Duke Memory Disorders Clinic

The MDC, established in 1986 as the clinical component for the Joseph and Kathleen Bryan Alzheimer's Disease Research Center (Bryan ADRC), treats a wide range of memory problems arising from diverse medical causes including neurodegenerative diseases (Alzheimer's disease, vascular problems, and other neurological disorders). The MDC provides comprehensive evaluations and outpatient care.

Helpful Books

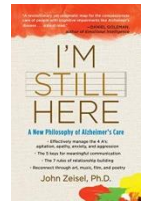

The Alzheimer's Action Plan: What You Need to Know--and What You Can Do--about Memory Problems, from Prevention to Early Intervention and Care

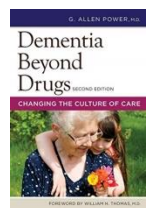

P. Murali Doraiswamy M.D., Lisa P. Gwyther M.S.W., et al. | Apr 28, 2009

I'M Still HERE a revolutionary new approach to Alzheimer's care, focusing on a patient's strengths to maintain connections with others and the world

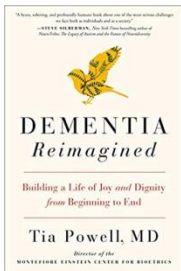

here currently is no cure for Alzheimer's disease— though it can be treated. For the last fifteen years, John Zeisel, Ph.D. has spearheaded a movement to treat Alzheimer's non-pharmacologically by focusing on the mind's strengths.

Dementia Beyond Drugs: Changing the Culture of Care Years before the federal government started setting goals to reduce the use of psychotropic drugs in long-term care settings, Dr. Al Power argued eloquently in his trailblazing book Dementia Beyond Drugs about the harm done by these

medications in the symptomatic treatment of dementia

Dementia Reimagined: Tia Powell,

The cultural and medical history of dementia and Alzheimer's disease by a leading psychiatrist and bioethicist who urges us to turn our focus from **cure to care.** Despite being a physician and a bioethicist, Tia Powell wasn't prepared to address the challenges she faced when her grandmother, and then her mother, were diagnosed with dementia--not to mention confronting the hard truth that her own odds aren't great.
